

Google Classroom

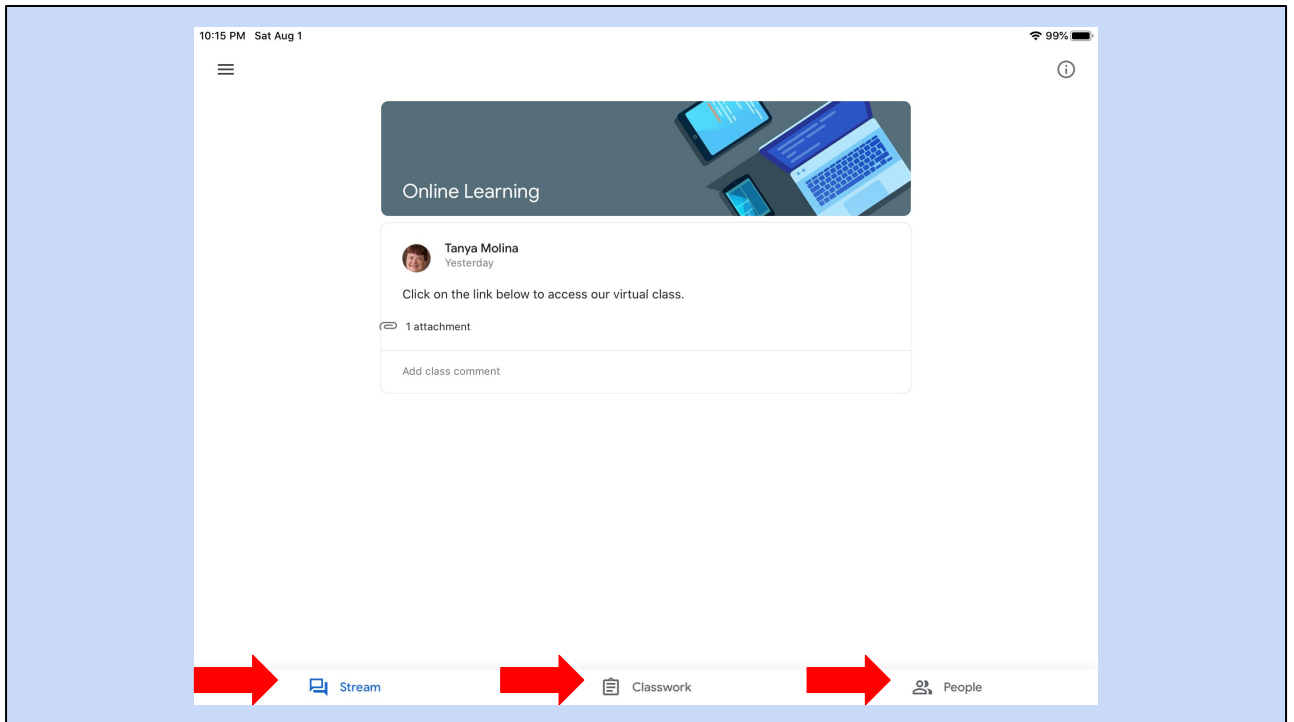

How to Add
a Class

Refresh a Page in Classroom

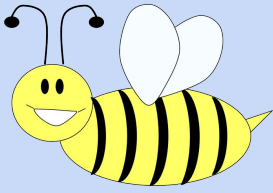

- Pull down the page from the top of the screen and it will reload or refresh
- Try it out!

Click on any Join button. You should have one for I'm Done! and Online Learning.

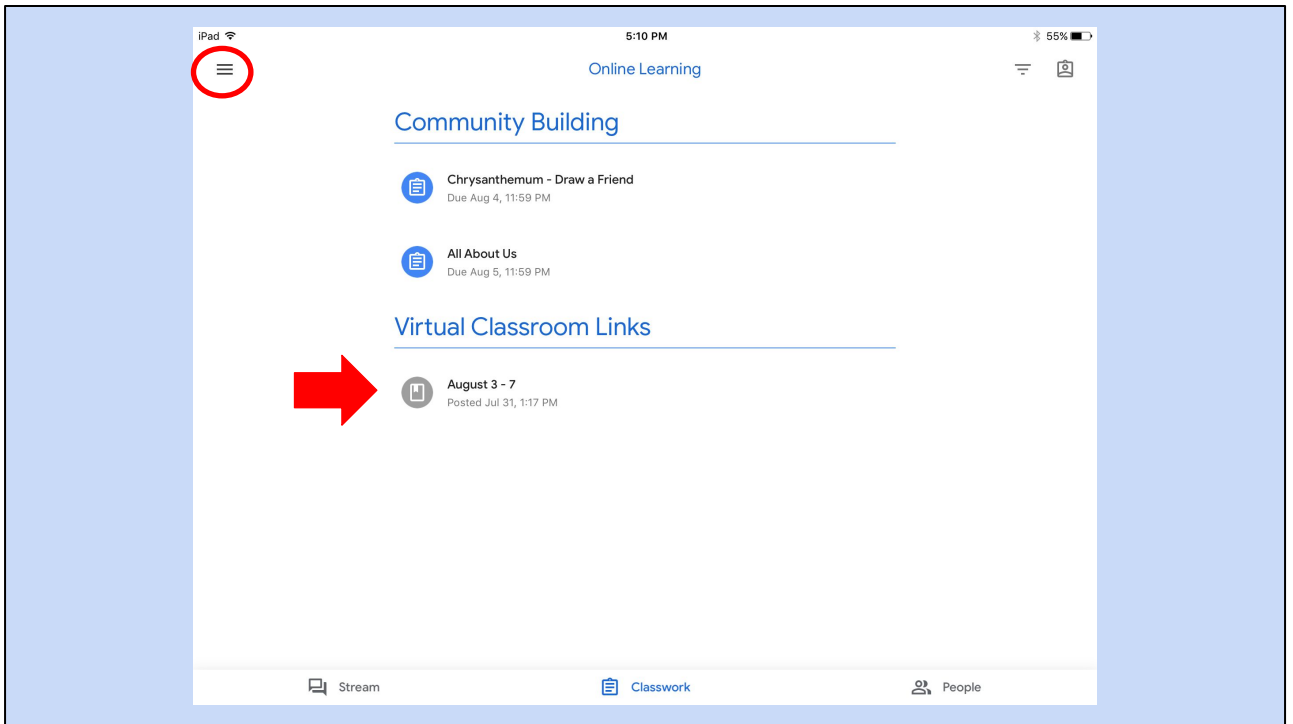

The Stream button is where I will post messages. I do not use this very often. The People button is where you see who is in the class. You do not need to click on this button at all. The Classwork button is the most important. This is where you will see the classwork you need to complete and where you turn it in.

Online Learning Class

What is the Online Learning class?

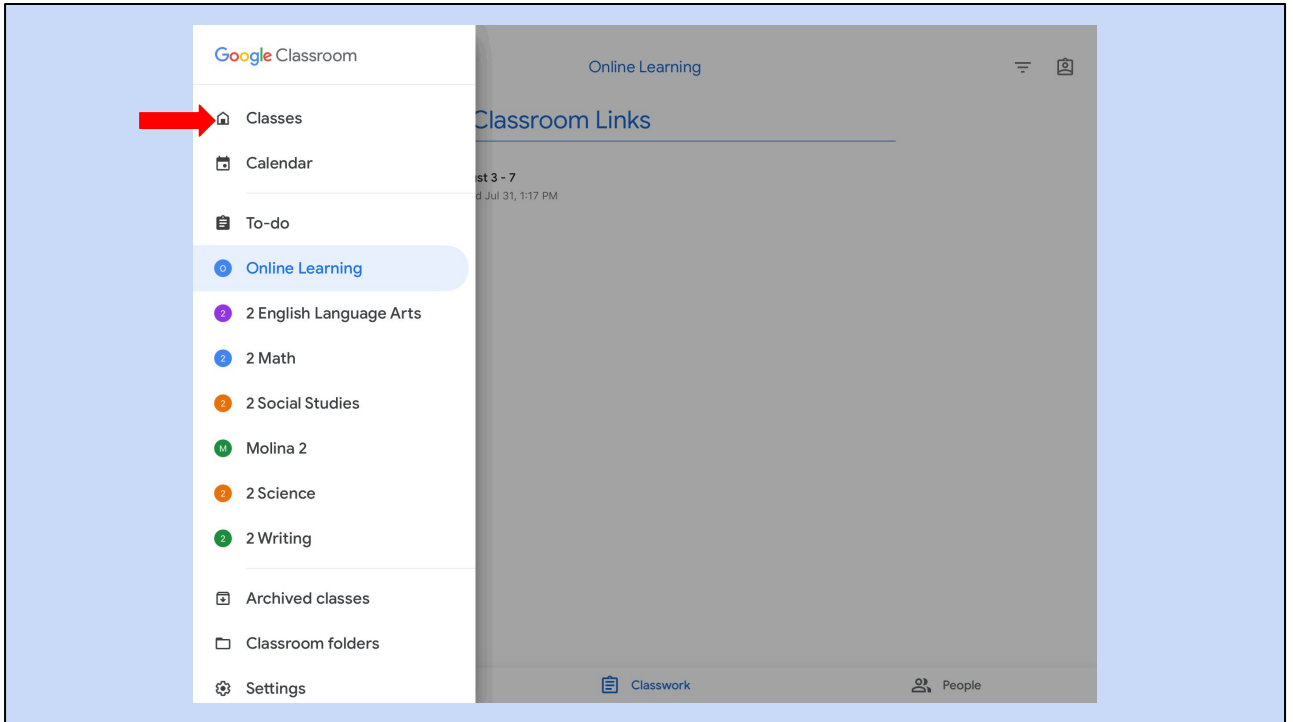

- Where you log into our virtual class
- Extra materials that you will need before you log into the class

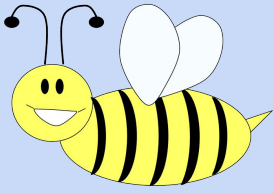

In the Online Learning Class, this is where you will connect to our Virtual Classroom each week. You will click on the week and then click on the link. In that same place I will tell you if you need anything extra that week.

There is also a section on Community Building that we will be using this week.

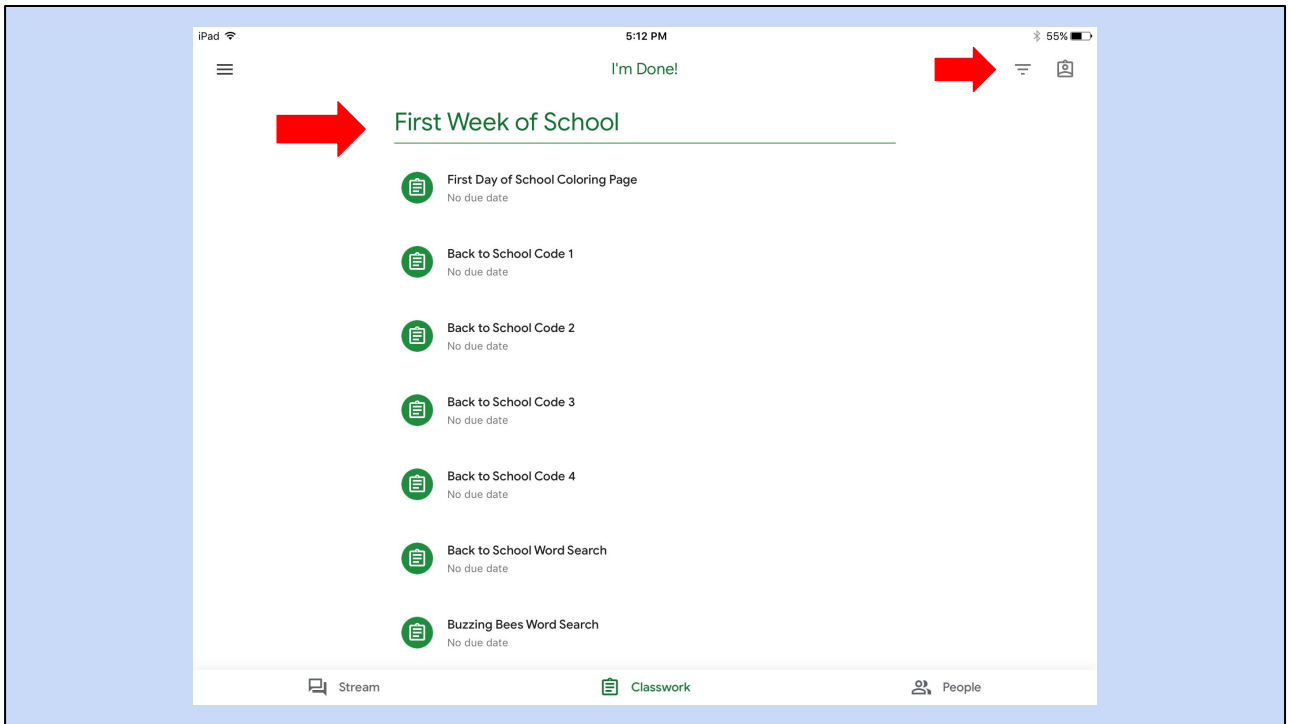

How do I get back to see all my classes? Click on the three lines in the upper left corner. Let's try that now.

You will see a list of all your classes. At the very top you will see the word Classes. Click on that to bring you back to the Classroom home page.

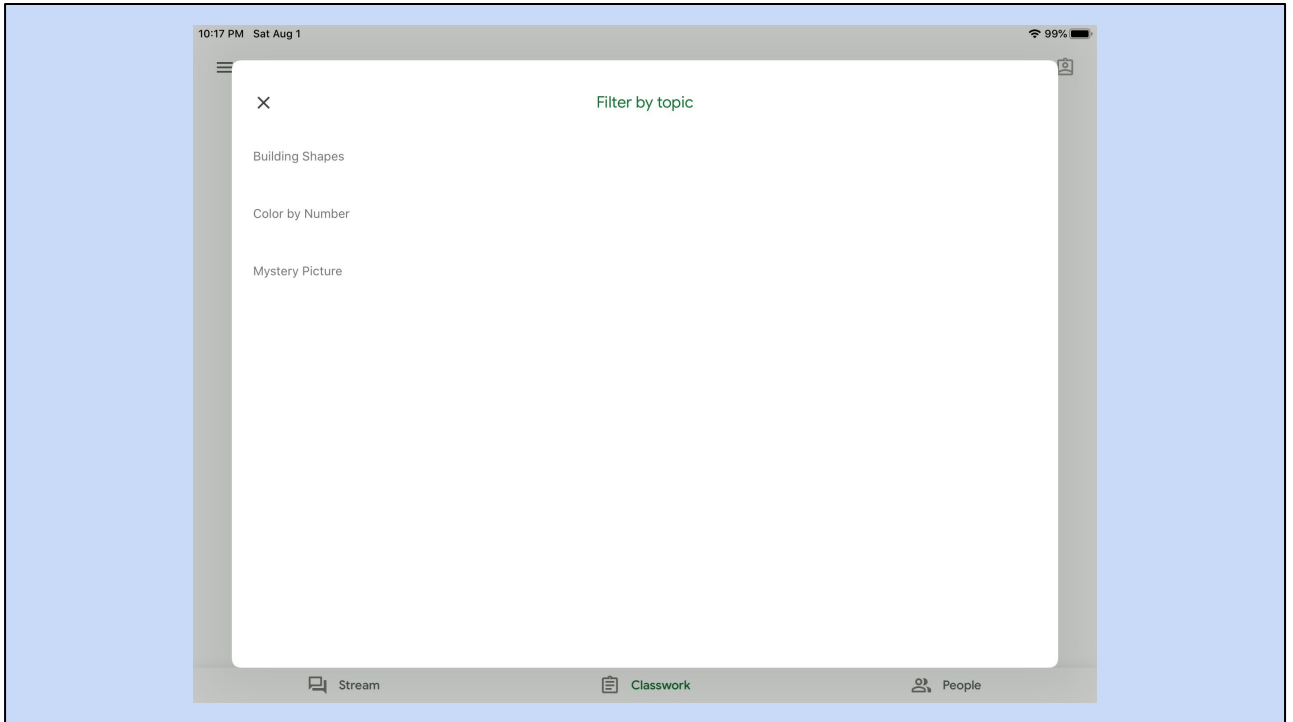

I'm Done Class

In the I'm Done class, you will see several topics. They are big text and are underlined. Everyone scroll down and see what is here.

There is a quick way to go to the topic you want instead of scrolling down. In the upper right corner you will see three lines that get smaller. When you click on them, you will a list of all the topics.

Then you just have to select your topic and it will take you there. Try it out with a couple of the topics.

When do I get to go into the I'm Done class?

- When you finish an assignment and the time is not over yet

What is in the I'm Done class?

- Building Shapes
- Color by Number
- Mystery Pictures
- Extra Practice
- Math Games
- Reading Games
